TRS Swiss Production is REACH READY

REACH stands for **Registration, Evaluation, Authorization and Restriction of Chemicals**.

This EU Regulation No 1907/2006 entered into force on 1st June 2007. The aim of REACH is to improve the protection of human health and the environment through earlier and more substantial identification procedures of the properties of chemical substances. However, the legislation is multifaceted and comprehensive in its requirements and implications. The REACH regulation will give greater responsibility to industry to manage the risk from chemicals and to provide safety information on all substances. The benefits of the REACH system will gradually increase, as more and more substance are phased into REACH.

TRS SWISS PRODUCTION is a producer of remanufactured cartridges. All of the products are considered as Articles according to Article 3. The only product used in connection to this remanufacturing process containing a chemical base, is toner powder considered as Chemical according to the same Article.

Article 33 of REACH requires companies to provide the recipients of Articles, and consumers on request, with sufficient available information to allow the safe use of Articles, including, as a minimum, the presence in a concentration of greater than 0.1% by weight of any substances of very high concern – SVHC, as listed on the REACH candidate list for inclusion in Annex XIV.

TRS SWISS PRODUCTION has been working with its supply chain partners to identify the use of any of the candidate chemicals in the production of our products. No TRS products have been identified as containing any of the substances included on the candidate list above a concentration of 0.1% by weight, since they are imported into Europe by our suppliers and registered by raw material manufacturers within the supply chain.

TRS SWISS PRODUCTION continues to refine its internal processes to actively assess all elements of the supply chain on a regular basis. We will provide updated information of any changes required for the continued safe use of its products should circumstance change or when amendments to the Candidate List occur.

TRS SWISS PRODUCTION will continue to work closely with the supply chain to ensure that all the requirements of REACH are fully implemented.

Sincerely,

PP Snežana Vuković
Snežana Vuković
